Patient Lists

Expected Discharge Date Indicator

Overview of Feature and Changes

Effective April 6, 2019: In an effort to improve patient throughput, changes have been made to the **Room/Bed** column in Patient Lists. The new name for this column is **Room and Bed Highlighted**. The column will now be color coded based on the **Expected Discharge Date (EDD)** of the patient. This change will affect **all** patient lists (**Available System Lists** and **My Lists**) that have the Room/Bed column in the list, including the column block, **Patient Location**.

- **Red** = Expected discharge date is today or in the past.
- **Yellow** = Expected discharge date is tomorrow.
- **No color / white** = Expected discharge date is beyond tomorrow, in the future, or undefined.

Depending on how the patient list displays, you may see the room/bed field displayed as an oval or rectangle.

See examples below:

Patient Location		Patient Information	Problem	Attending	Code Status Text	Unacknowl Orders	M O
2 PPD GYN CC	1 201/1	Patient Location: This column grouper display the patient's unit, location, bed and room. If room and bed are Red, Expected D/C date is Today or in the Past. If Yellow, Expected D/C date is Tomorrow.	None		Not on file	—	—
2 PPD GYN CC	1B1 201/1B1	6-week old	None		Not on file	—	—

Unit	Room and Bed Highlighted	Patient Name (Preferred)	Age	Problem	Attending	Code Status Text	Unacknowl Orders
