Message from Amit

I have really enjoyed the start to the academic year this year with our grand rounds course. I am impressed with the quality of the talks and the participation from the group. Thank you for participating with our changes, including our constructive feedback to the presenters so that we can all continue to improve. It was great to see Upstate 'represent' in the tri-institutional conference in Rochester. Special shout out to Liam's oral presentation to the group and excellent poster presentations from so many of you. Do not hesitate to reach out if you have any questions or concerns.

Message from Andrea

Recruitment season is in full swing! For all who participated directly or indirectly, thank-you. Your collective investment in the legacy of our program is apparent and appreciated. I'm biased but I think this program is special and it's because of all of you!

Happy Birthday

MDPHD Non-Human Companions

Featuring: Cody and Ethan

Gargi's Family Dog

Cody, my family dog back home would be my prime non-human companion. He is a black lab, around 6 years old. He loves to eat, rest, play tug of war, eat some more, and cuddle. Over the last few years, he has learned the concept of facetime calls. So, whenever I call my mom, he comes running to the phone with a toy and often engages with the screen! He is a fierce protector of the family. Sadly, he forgets that I'm a part of the family for the first few days when I visit home since my visits aren't as frequent.

But even then, he is a very good boy." - Gargi
