

Fundamentals in Clinical Research: a Step-by-Step Approach to Success

An In-Person or Virtual, Interactive, One Day Course

Free and open to the Upstate community

Date and Time: Monday, June 23rd, 2025, 8:00 am - 5:00 pm

In-Person Location: Upstate Biotech Accelerator, 841 E Fayette St, Syracuse

Who Should Attend?

Students, Faculty, and Research Support Professionals who wish to deepen their understanding of how to select, plan, execute, and complete clinical research projects. Participants will earn a certificate of completion upon finishing the course.

Learning Objectives:

- Understand the distinct roles and responsibilities in clinical research
- The do's and don'ts of human subjects research
- Gain hands-on knowledge for initiating and managing clinical trials

Topics:

- You're the Principal Investigator: Now what?
- What is the FDA and why do they matter?
- How do we know that the data collected are true?
- What is an IRB and how do they protect study participants?
- How do I get a study started at Upstate?
- What does a trial cost and how do I work with a Sponsor?

Register by June 13th to save your spot!
