

**New York City Poison Control Center (NYC PCC) Consultants' Conference
April 1, 2021**

Consultants' Conference is a monthly meeting attended by medical toxicologists, emergency physicians, pharmacists and other learners from all over the Northeast. It is an educational activity in which the *Consultants* (renowned experts in various medical specialties) provide insight into the analysis and approach to the diagnosis and treatment of interesting toxicologic cases. The cases are presented mostly by the NYU Toxicology fellows in training, but anyone can present their case if deemed appropriate. Learners of all levels can benefit from the rich and often dynamic discourse.

The next NYC PCC Grand Rounds and Consultants' Conference will be held on Thursday, April 1, 2021. Grand Rounds will occur from 1:00 to 1:45 p.m. EST. The topic and speaker will be:

"Hack's Impairment Index: Bringing order to the amorphous"

**Jason B Hack, MD, FACEP, FACMT
Professor of Emergency Medicine
Vice-Chair, Departmental Research
Chief, Division of Medical Toxicology
Attending Physician, Vidant Medical Center
East Carolina University
Brody School of Medicine
Department of Emergency Medicine**

Consultants' Conference will take place shortly after the Grand Rounds lecture is over starting at 2 p.m. EST and ending at 4 p.m. EST.

We will be broadcasting both the Grand Rounds lecture and Consultants' Conference via the same link on WebEx and there WILL NOT be a live conference at the Public Health Laboratory. Please click [here](#) to register to download the WebEx outlook file.

Please Note: If you would like to receive this monthly announcement on a regular basis, please register for the conference at the link above, even if you are unable to attend.

**Please post and distribute.
All are welcome.**

Cases to be discussed for Consultants' Conference include:

1. A 5-year-old girl with no known significant past medical history is brought to the ED after a witnessed "sip" of windshield washer fluid two hours prior to presentation. She is asymptomatic. Her initial vital signs in the ED are: BP, 118/80 mm Hg; HR, 80 beats/minute; RR, 16 breaths/minute; T, 98.6°F; O₂ Sat, 100% (RA); Point of Care Glucose, 101mg/dL.
2. A 59-year-old man with a past medical history of hypertension, diabetes mellitus, and chronic knee pain presents to the ED with a chief complaint of diarrhea and brown urine. He admits to intentionally taking a one month supply of one his medications over the past three days. His vital signs in the ED are: BP, 114/70 mm Hg; HR, 104 beats/minute; RR, 22 breaths/minute; T, 97.7°F; O₂ Sat, 95% (RA).
3. A 51-year-old man with no known significant past medical history and not taking any medications presents to the ED complaining of rib pain after a fall. His initial vital signs are: BP, 147/80 mm Hg; HR, 70 beats/minute; RR, 18 breaths/minute; T, 97.9°F; O₂ Sat, 92% (RA). On physical examination, he is noted to have blue lips and bilateral clubbing of his digits.

Mark K. Su, MD, MPH
Director, New York City Poison Control Center

Jointly Provided by the NYU Grossman School of Medicine and the Poison Control Center.

Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the NYU School of Medicine and the Poison Control Center. The NYU Grossman School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Credit Designation Statement

The NYU Grossman School of Medicine designates both of these as live activities for a maximum of 0.75 *AMA PRA Category 1 Credits™* for Toxicology Grand Rounds and 2 *AMA PRA Category 1 Credits™* for Consultants' Conference. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosure Statement

The NYU Grossman School of Medicine adheres to ACCME accreditation requirements and policies, including the Standards for Commercial Support regarding industry support of continuing medical education. In order to resolve any identified Conflicts of Interest, disclosure information is provided during the planning process to ensure resolution of any identified conflicts. Disclosure of faculty and commercial relationships as well as the discussion of unlabeled or unapproved use of any drug, device or procedure by the faculty will be fully noted at the meeting.
