

New York City Poison Center Consultants' Conference

JUNE 2026

Consultants' Conference is a monthly meeting attended by medical toxicologists, emergency physicians, pharmacists and other learners from all over the Northeast. It is an educational activity in which the *Consultants* (renowned experts in various medical specialties) provide insight into the analysis and approach to the diagnosis and treatment of interesting toxicologic cases. The cases are largely presented by the NYU Toxicology fellows in training, but anyone can present their case if deemed appropriate. Learners of all levels can benefit from the rich and often dynamic discourse.

The next NYC Poison Center Grand Rounds and Consultants' Conference will be held on June 4, 2026. Grand Rounds will start at 1PM EST and Consultants' Conference will follow immediately. The topic and speaker will be:

Toxicology and HIV/AIDS Care

Aaron Bola, MD

Senior Fellow in Toxicology

NYU Grossman School of Medicine/New York City Poison Center

Consultants' Conference will take place from 2 PM - 4 PM EST.

The live conference will be held on the NYU Campus in the Medical Science Building Schwartz Lecture Hall located on the Ground Floor; we will also broadcast via Zoom. Please click [here](#) to register.

Please Note: If you would like to receive this monthly announcement on a regular basis, please email me to be placed on the listserv.

Select cases that will be discussed include:

1. A 31-year-old pregnant woman at 16 weeks gestation presents to the ED after the unintentional ingestion of three pills of her mother's medication over the course of 36 hours; one pill was ingested every 12 hours for three doses prior to realizing her error. Her initial vital signs are: BP, 117/71 mm Hg; HR, 71 beats/minute; RR, 18 breaths/minute; T, 97.6 degrees Fahrenheit, O₂ Sat, 100% (room air).
2. A 67-year-old woman presents to the ED from an outpatient dermatology office after developing increased erythema to her face. She reports receiving several different therapeutic injections and her symptoms began several hours after leaving the dermatology office. Her initial vital signs are: BP, 160/88 mm Hg; HR, 68 beats/minute; RR, 18 breaths/min; T, 98 degrees Fahrenheit. On physical examination, she has an area of erythema extending from her left nasolabial fold to under her left mandible.
3. A 49-year-old man with a history of stage IV prostate cancer presents to the ED with lethargy and respiratory depression after a reported overdose of multiple medications. He is given 2mg naloxone intravenously by EMS and another 0.04mg naloxone in the ED which improves his respiratory rate, but not his mental status. His initial vital signs in the ED are: BP, 74/65 mmHg; HR, 117 beats/minute; RR, 5 breaths/minute; T, 94.8 degrees Fahrenheit (rectal); O₂ Sat, 99% (100% FiO₂ via non-rebreather facemask). Emergency Medical Services provides photographs of a detailed suicide note written by the patient detailing the his wishes for DNR status.

Mark K. Su, MD, MPH
Director, New York City Poison Center

Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the NYU School of Medicine and the Poison Control Center. The NYU Grossman School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Credit Designation Statement

The NYU Grossman School of Medicine designates both of these as live activities for a maximum of 0.75 *AMA PRA Category 1 Credits™* for Toxicology Grand Rounds and 2 *AMA PRA Category 1 Credits™* for Consultants' Conference. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosure Statement

The NYU Grossman School of Medicine adheres to ACCME accreditation requirements and policies, including the Standards for Commercial Support regarding industry support of continuing medical education. In order to resolve any identified Conflicts of Interest, disclosure information is provided during the planning process to ensure resolution of any identified conflicts. Disclosure of faculty and commercial relationships as well as the discussion of unlabeled or unapproved use of any drug, device or procedure by the faculty will be fully noted at the meeting.
